

INFO 6150 – Final Project Submission

Well Eat: Know before you eat

A journey through our development process, focusing on creating a healthy and user-friendly experience.

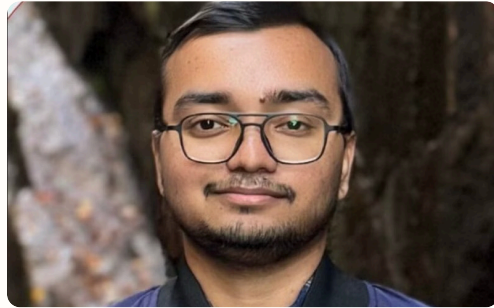

Team - HonoredOnes

The HonoredOnes Team

Prayas Lashkari

Designer, Developer with a passion for creating beautiful and functional user experiences.

Amritesh Anand

Experienced Fullstack developer with a passion for building scalable and performant web applications.

Hritik Hassani

Developer and Entrepreneur with a focus on building products that solve real-world problems.

Shubham Bhadra

Experience Backend Developer and Data Engineer with a focus on building scalable and reliable backend systems.

Tech Stack Overview

React & TypeScript

Core frontend technologies for robust development

PWA Capabilities

Enabling offline functionality and app-like experience

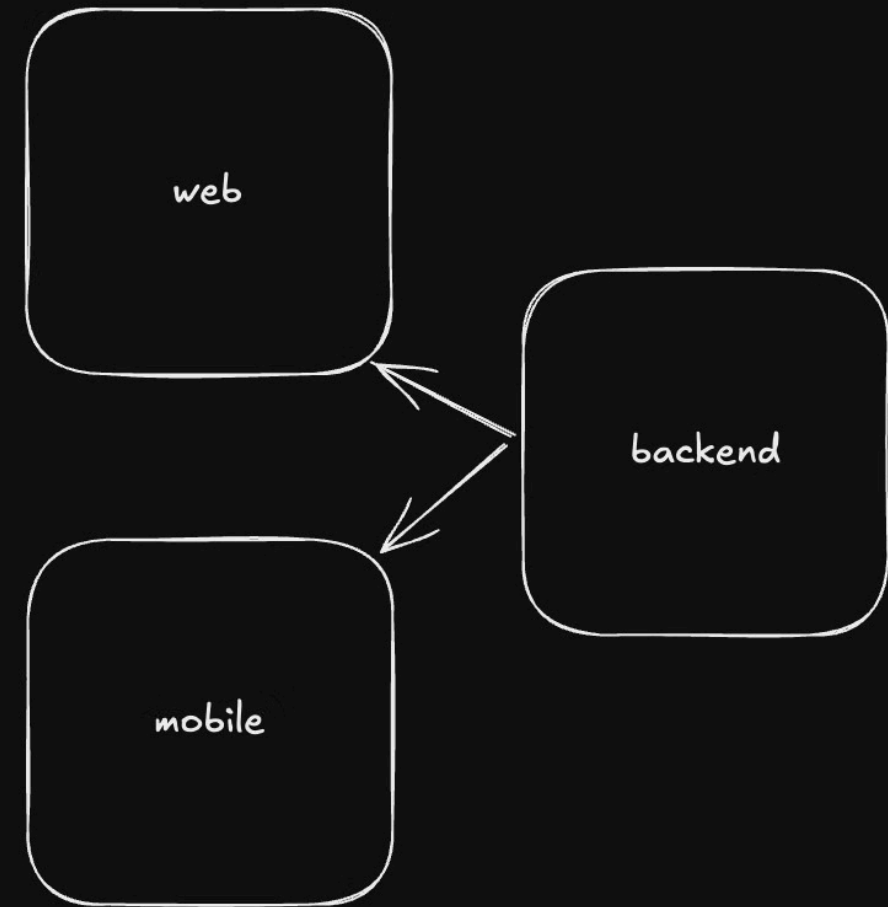

Internationalization

Supporting English, Chinese, Tamil & Hindi languages

Component & Unit Testing

Storybook for Component Development, Jest and React Testing Library for unit testing

Project Structure

1

Yarn Workspaces

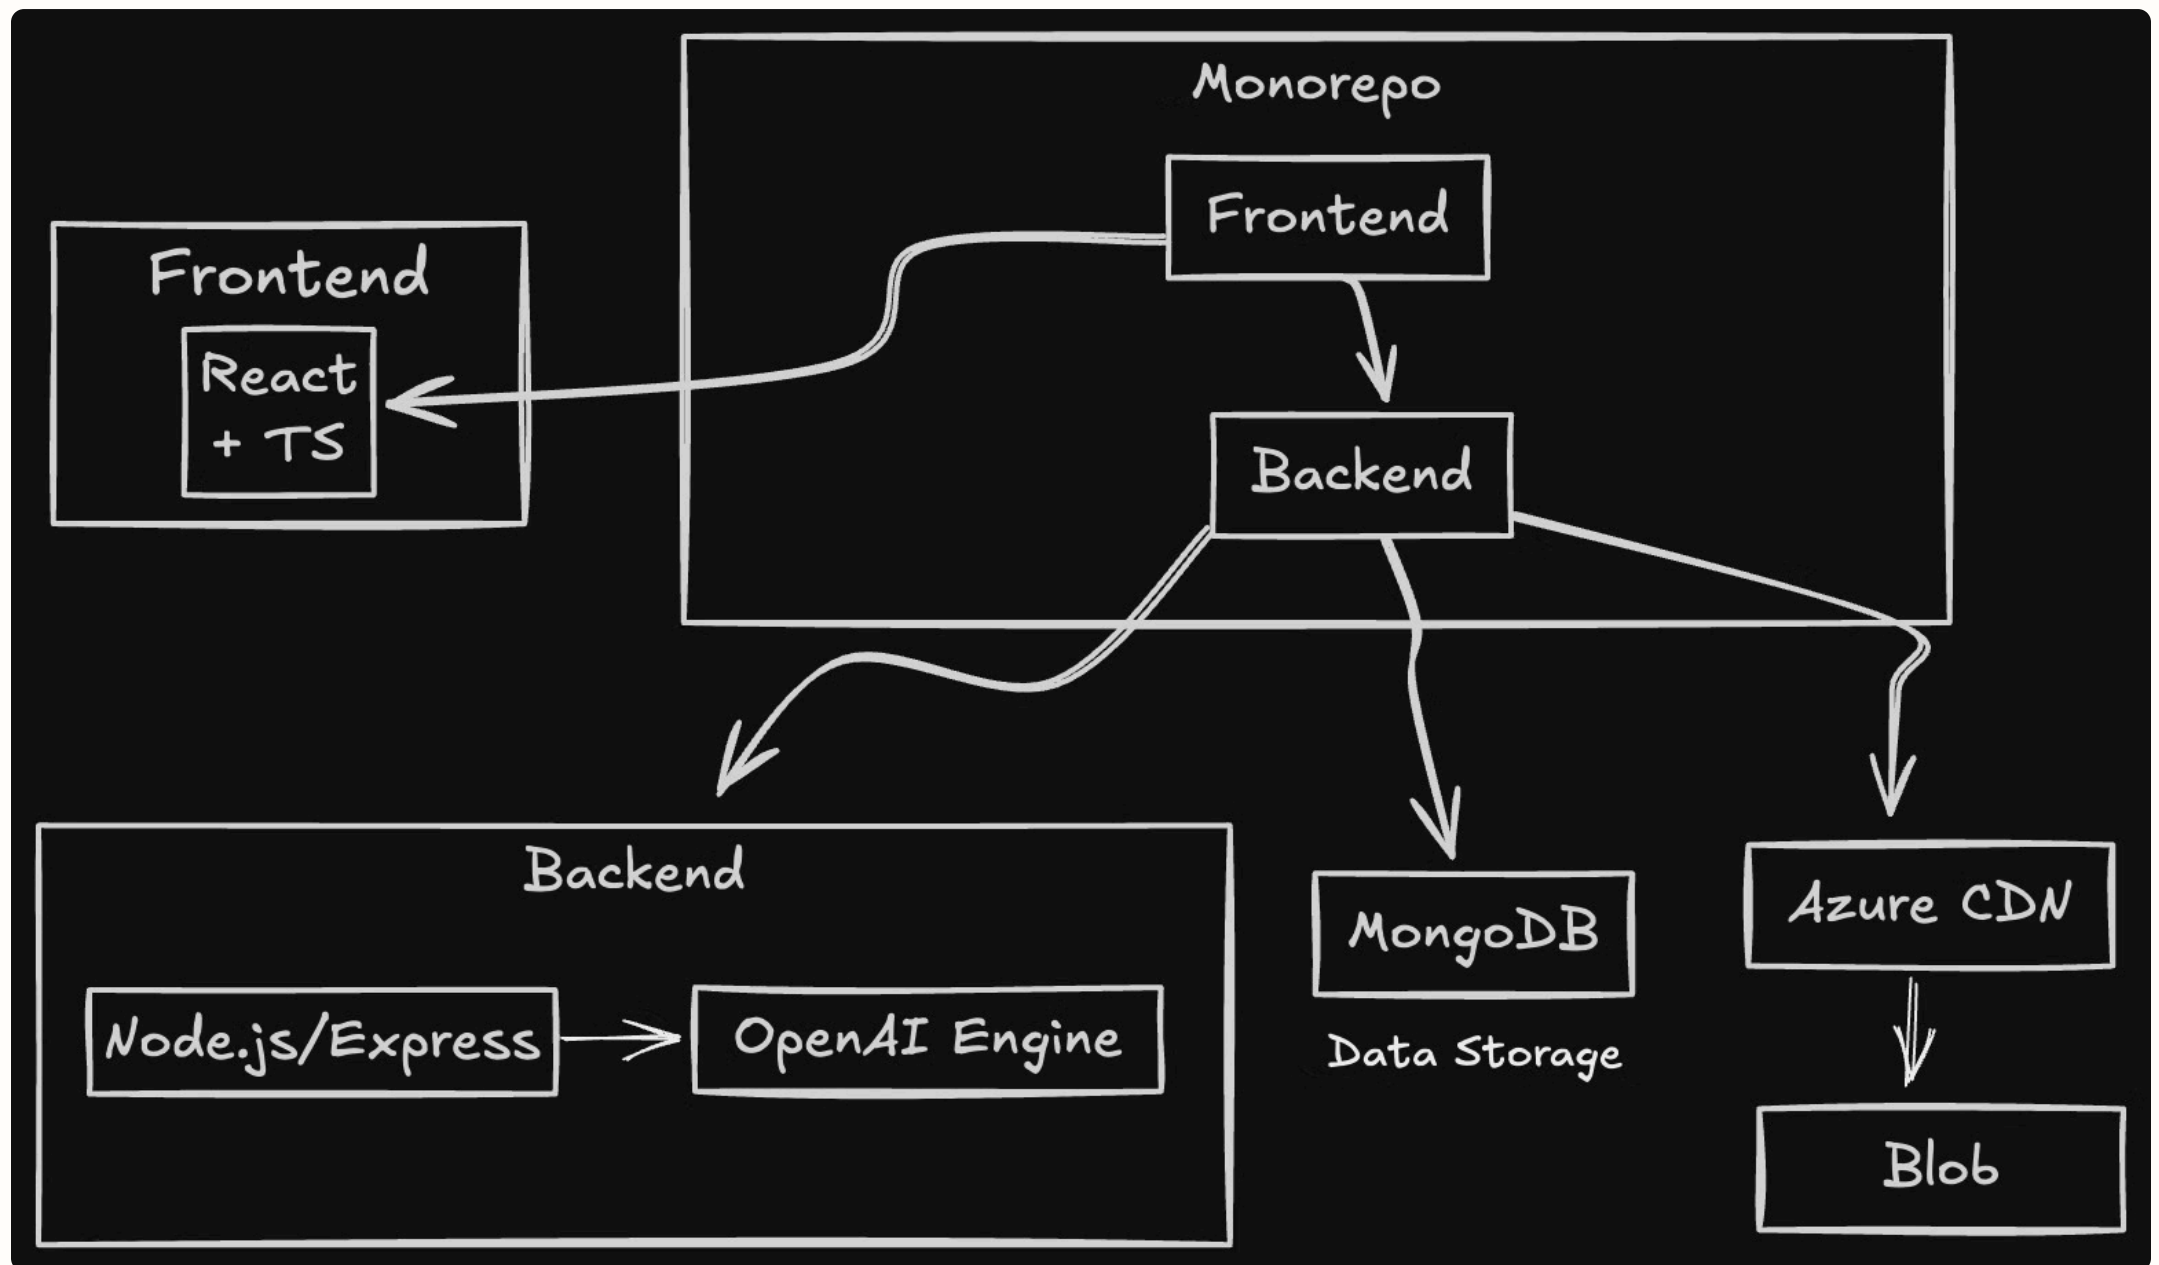

Efficient package management and dependency sharing

2

Monorepo Architecture

Packages: frontend, backend, and mobile

Architecture

Frontend

React, TypeScript, Vite for rapid development

Backend

API development, database management, server-side logic

Mobile (future)

Cross-platform mobile app development

Demo

Live Demo

Showcasing key features and user flow

Learnings

PWA App
Fugu Capabilities

Future Improvements

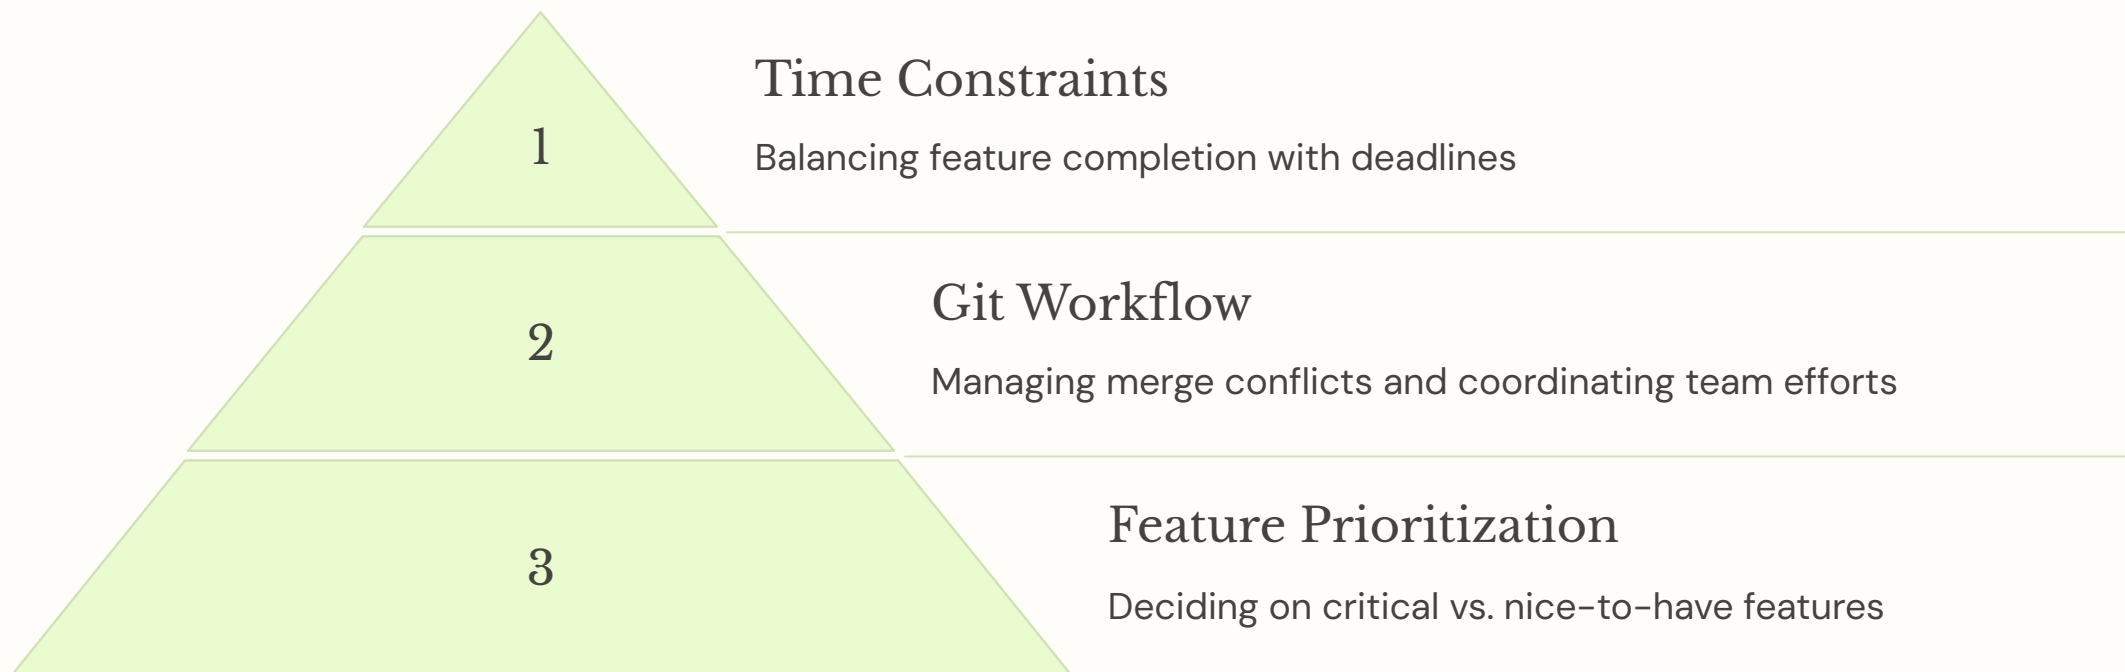

Planned enhancements and feature additions
